

DRIVING CHANGE, DELIVERING DIGNITY – ELECTRIC BUGGY HANDOVER CEREMONY UNDER PROJECT SANJEEVINI

Under Project Sanjeevini, the flagship village adoption initiative of Project Aadi, Oleevia Foundation marked a historic milestone with the handover of an electric buggy to the residents of Naduppathy Tribal Settlement, Walayar. More than a vehicle, the buggy represents dignity, accessibility, and inclusion—addressing the long-standing transportation challenges faced by tribal families while reaffirming the Foundation’s commitment to improving everyday lives through meaningful interventions.

A Celebration of Hope and Partnership

The event witnessed the gracious presence of Shri Dileep, renowned Malayalam cine actor, as the Chief Guest, along with Shri Suresh, acclaimed Malayalam actor and director, whose participation inspired the community and highlighted the importance of collective social responsibility. The ceremony was presided over by Shri Krishnakumar K T, CMD, Oleevia Group, and Shri Ajitkumar Varma, CEO, Oleevia Foundation, reaffirming the organization’s unwavering commitment to sustainable tribal development.

Mobility that Transforms Lives

For years, the residents of Naduppathy have faced difficulties in accessing the National Highway, healthcare facilities, educational institutions, markets, and essential public services due to limited transportation. The electric buggy bridges this critical gap, ensuring safer and more convenient mobility for children, women, senior citizens, and persons requiring urgent access to essential services. It is a practical solution that restores independence, confidence, and opportunity.

More Than a Vehicle—A Symbol of Inclusion

The handover ceremony reflected Oleevia Foundation's philosophy that development must begin by addressing the everyday realities of underserved communities. The electric buggy symbolizes trust, compassion, and partnership between the Foundation and the people of Naduppathy. It complements the broader objectives of Project Sanjeevini, which integrates sustainable agriculture, livelihood development, youth empowerment, education, and community leadership into a holistic model of village transformation.

Driving Towards a Sustainable Future

As the electric buggy embarked on its first journey through Naduppathy, it carried with it the aspirations of an entire community. The initiative stands as a reminder that meaningful development is achieved when infrastructure, compassion, and community participation move together.

Program Spotlight

- Electric buggy handed over to Naduppathy tribal residents under Project Sanjeevini
