

Oleevia Foundation Signs MoU with PIMS Hospital to Strengthen Community Health Initiatives

In a significant step towards expanding healthcare access and awareness, Oleevia Foundation signed a Memorandum of Understanding (MoU) with PIMS Hospital, Palakkad, under its flagship initiatives, Jankaari and Nairujya Bharat. The partnership aims to leverage the strengths of both organizations to deliver quality healthcare services, preventive health awareness programs, screenings, and community outreach activities, particularly among underserved and vulnerable populations.

Building a Strong Healthcare Partnership

The MoU establishes a framework for long-term collaboration between Oleevia Foundation and PIMS Hospital in the areas of health promotion, disease prevention, awareness generation, and community-based healthcare interventions. By combining the Foundation's extensive grassroots network with PIMS Hospital's medical expertise, the partnership seeks to create sustainable healthcare solutions that address both immediate and long-term community health needs.

Expanding Access to Preventive Healthcare

A key focus of the collaboration will be preventive healthcare and early intervention. Through health camps, awareness sessions, screenings, counselling services, and educational programs, the initiative aims to improve public understanding of health-related issues and encourage timely medical attention. Special emphasis will be given to rural communities, tribal populations, women, children, and other groups.

Creating Lasting Community Impact

The partnership reflects a shared commitment to building healthier communities through awareness, accessibility, and empowerment. Under Project Jankaari, communities will benefit from improved health literacy and access to reliable information, while Nairujya Bharat will focus on facilitating healthcare services and promoting preventive health practices. Together, these efforts will contribute towards improving health outcomes and enhancing overall community well-being.

Guided by a Vision for Health and Social Development

The collaboration embodies the visionary leadership of Shri Krishnakumar K. T., CMD, Oleevia Group, whose commitment to holistic community development continues to guide the Foundation's initiatives. His vision recognizes that sustainable development is only possible when communities have access to quality healthcare and health awareness.

Program Spotlight

- Established a strategic healthcare partnership between Oleevia Foundation and PIMS Hospital, Palakkad.
- Enhanced access to preventive healthcare and health awareness programs
- Strengthened healthcare outreach among rural, tribal, and vulnerable communities.
