

OLEEVIA FOUNDATION ENHANCES CLEAN DRINKING WATER ACCESS IN SCHOOLS

4 NOVEMBER 2025

Oleevia Foundation recently sponsored a water purifier for Saraswati Vidyaniketan Central School, Kodakara, ensuring students have reliable access to clean and safe drinking water. The initiative reflects the Foundation's commitment to improving health and well-being in educational spaces. The new facility supports better hydration, reduces waterborne risks, and contributes to creating a healthier environment for the school community, especially during the demanding academic schedule.

WARM APPRECIATION FROM THE SCHOOL COMMUNITY

The installation was warmly welcomed by the school management, teachers, and students, who expressed sincere gratitude for Oleevia Foundation's timely support. Clean drinking water plays a crucial role in students' physical readiness, focus, and everyday learning. By addressing this essential need, the Foundation reinforced its dedication to improving basic infrastructure and ensuring that children have a safe, hygienic, and supportive educational environment.

ALIGNED WITH OLEEVIA FOUNDATION'S VISION OF COMMUNITY WELFARE

This initiative was carried out under the leadership and commitment of Oleevia Foundation's team, reflecting a clear vision for community wellness and sustainable development. The water purifier sponsorship aligns with the Foundation's ongoing health and hygiene interventions across Kerala. By strengthening schools through essential infrastructure support, Oleevia Foundation continues its mission to uplift communities and create meaningful, long-term impact for young learners and their families.

ADVANCING HEALTH, HYGIENE, AND EDUCATIONAL WELL-BEING

The water purifier donation holds significant importance at a time when access to safe drinking water is considered a fundamental requirement for healthy childhood development. Many students, especially in semi-urban and rural school settings, face risks associated with untreated water, which can impact attendance, immunity, and academic performance. By providing a modern purifier, Oleevia Foundation is not only safeguarding the health of children but also enabling a better learning atmosphere. This initiative reflects the Foundation's belief that small but essential improvements can lead to transformative change in educational outcomes. The support also encourages a culture of hygiene and preventive health practices within the school, benefitting both students and staff.
